solutions

CONNECTING YOU
TO SOLUTIONS FOR THE
AUTOMOTIVE MARKET

nexeosolutions.com

AUTOMOTIVE

Our automotive team has extensive market knowledge to provide application and supply chain solutions. In partnership with our suppliers, we form a seamless entity delivering materials when and where you need them. We have built a specialized team of sales representatives concentrating on automotive products and backed them up with knowledgeable senior technical service and customer service representatives to ensure the best possible service to meet your needs.

OUR TEAM OFFERS

- Specialized technical service including application problem solving
- Concurrent engineering approach to program management
- Assistance in part design
- Process optimization
- Material selection

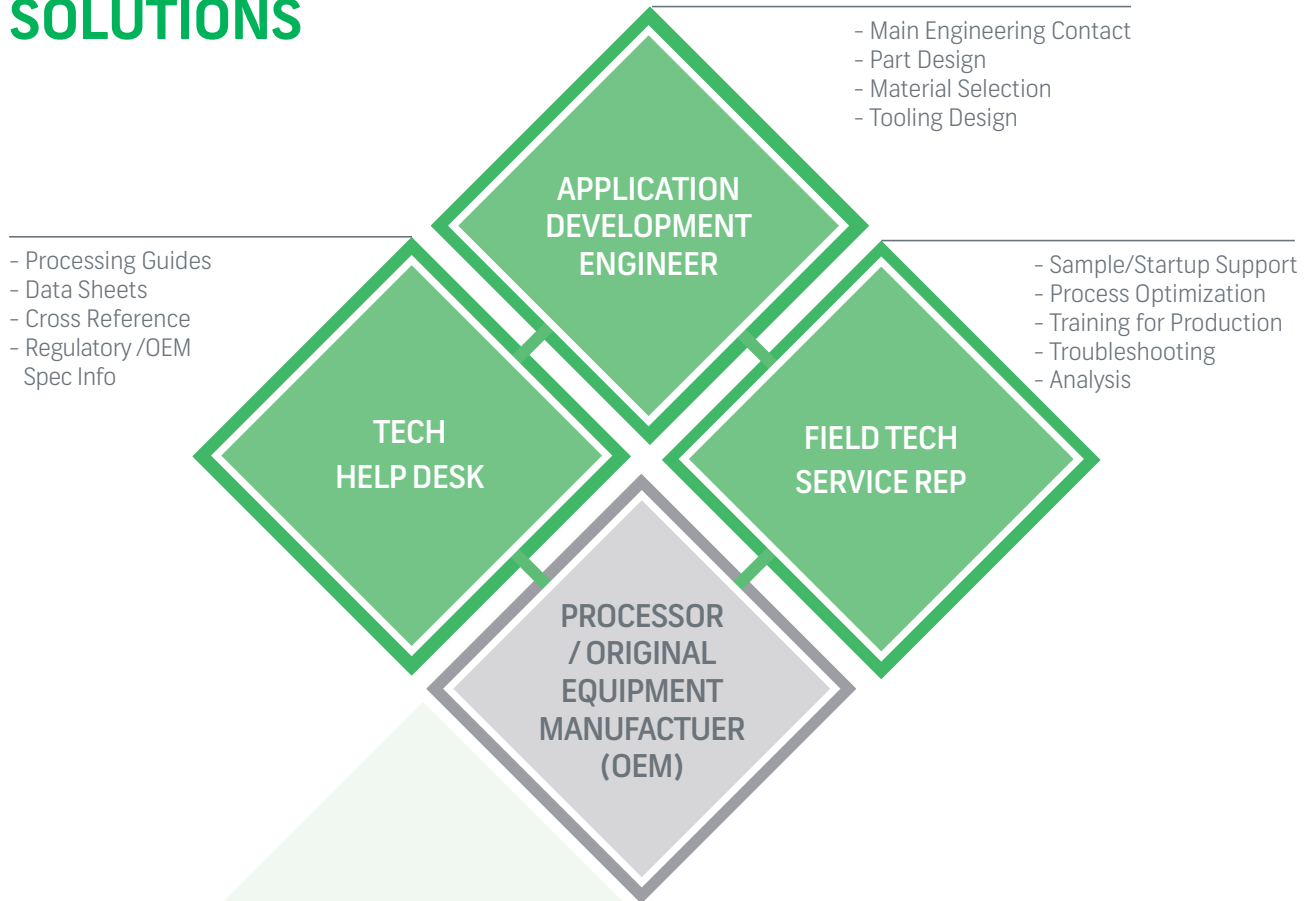

LOOK TO NEXEO SOLUTIONS FOR

- Consolidated material sourcing
- Locally stocked automotive grades –available for just- in-time delivery
- Automotive approved colors, salt and pepper color blending services
- Global customer and project coordination

TECHNICAL AND DEVELOPMENT

SOLUTIONS

PROVIDE TRANSACTIONAL

EFFICIENCIES

- Tailored Account Customer Service
 - Aligned customer service resources to satisfy customer requirements and business strategy
 - Manage customer pricing and supply
- Tailored Inventory management systems
- Dedicated Corporate Account Pricing Administrators

MATERIAL EXPERTISE FOR DIVERSE AUTOMOTIVE SEGMENTS

EXTERIOR

This area encompasses exterior applications that include devices such as bumpers, body and rocker panels, mirrors, front end carriers and wheel covers. These devices require high performances in both security and aesthetics since usually they are the first barrier in case of impact and the first and most visible part of the vehicles.

PERFORMANCE CONSIDERATIONS

- High UV stability
- High surface aesthetics
- Excellent paintability
- Dimensional stability
- Impact resistance
- Stiffness

TYPICAL APPLICATIONS

- Bumpers
- Body panels
- Rocker panels
- Mirrors
- Front end carriers
- Wheel covers

INTERIOR

The interior part components of the vehicles are very important to provide comfort and security to the passengers through including devices with excellent heat stability, scratch resistance, "soft touch" or low stickiness. The interior includes devices such as mid console, glove box and seat parts among others.

PERFORMANCE CONSIDERATIONS

- High dimensional stability
- "Soft touch"
- Heat stability
- High flowability
- Emission optimization
- Low stickiness
- Scratch resistance
- Low gloss

TYPICAL APPLICATIONS

- Mid Console
- Air vents
- Seat parts
- Glove box
- Door handles
- IP carrier
- Instrument panel

UNDER THE BONNET

This area is extremely sensible to changes in temperature, chemical products exposures and demanding acoustic environments during long periods of time. For this reason, devices included in that area have to excel in that conditions and at the same time show a good image.

PERFORMANCE CONSIDERATIONS

- Long term high heat resistance
- Chemical resistance
- Acoustic behaviour
- High mechanicals

TYPICAL APPLICATIONS

- Beauty/Engine cover
- Air intake manifolds
- Battery cases
- Cooling liquid container
- Air fans
- Battery carrier

ELECTRICAL & ELECTRONIC

Excellent electrical and electronics devices is a must have in order to assure the quality and security of the vehicles produced. For this reason, all the devices in that area have to excel in security conditions along all the product life. For example, devices such as cable channels and fuse boxes have to shine in performances in flame retardancy and keep its properties even in difficult environments with prolonged periods of time.

PERFORMANCE CONSIDERATIONS

- Flame retardancy
- Long life time cycles
- Electrical properties
- Heat ageing resistance

TYPICAL APPLICATIONS

- Power windows
- Sun roofs
- Locking systems
- Cable Channels
- Fuse boxes
- Cables

STRUCTURAL PARTS

As well as the exterior and interior area of the vehicles, the structural parts have to perform in excellent security and stability conditions along the product life time.

PERFORMANCE CONSIDERATIONS

- Impact resistance
- Stiffness
- High UV stability

TYPICAL APPLICATIONS

- Clutch pedal carrier
- Pilars
- Window frames
- Front end carrier
- Gear lever housing

NEXEO SOLUTIONS

EUROPE

Working with **Nexeo Solutions**, customers will be able to achieve:

- Competitive pricing
- Small / medium / large quantities
- Superior customer service
- Strong / long-term relationships
- Wide product range
- Geographic coverage
- Flexibility to meet changing demand
- Technical Expertise in end application
- Product quality
- Optimal delivery leadtimes / reliability of delivery
- Efficient management & available inventory
